

Layers

With the use of the newest technology to obtain optimal formulated and mixed layer rations, Itau's layer range will complement the hen's genetic potential, thereby increasing profits by means of maximizing the production of eggs at the minimum possible feed intake.

221 Itau Extreme Lay

18 weeks (Point of lay) to 40 weeks

Hens start to produce eggs in this phase, but are still growing, meaning that nutritional requirements are very high. A superior ration for a superior start!

201 Itau Late Lay

65 weeks to cull

The ideal product to use for older hens. This product will ensure a drop in feed cost, but would still supply in the nutritional requirements of the hen.

211 Itau Complete Lay

40 weeks to 65 weeks

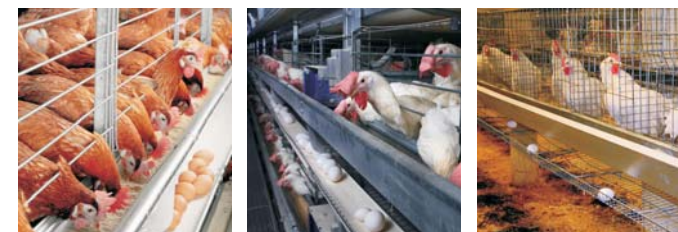

As hens stop growing during this phase, nutritional requirements are not that high anymore. Ideal product for multi-age systems.

281 Itau Layer concentrate

For producers that choose to add their own maize, use 40% Itau Layer concentrate with 60% yellow maize to mix a complete layer feed.

%	Protein (min)	Moisture (max)	Fat (min)	Fibre (max)	Ca	P (min)	Lys (min)
221 Itau Extreme Lay	150	120	25	70	35-45	5	6
211 Itau Complete Lay	150	120	25	75	35-45	5	5
201 Itau Late Lay	130	120	25	70	30-45	5	5
281 Itau Layer concentrate	275	120	25	120	88-100	10	13.5
