

# Pigs

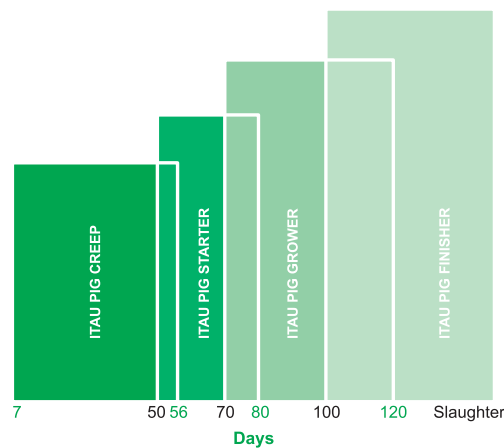

**Itau Animal Feeds'** swine feed range is the leading product on the market. The technology driven range will ensure optimum profitability achieved by sows remaining healthy and reach their production capacity. Growing piglets will reach their desired target weight faster.

## Growing pigs

Itau use only the best quality raw materials, selected specifically for pigs to ensure optimal growth and health. For growing pigs, we aim for the lowest possible feed conversion ratio.

## GROWING PIG RANGE

### 312 Itau Pig Creep

Supply Itau Pig Creep in creep stalls to suckling pigs while they are still with the sow. Use the product from the age of seven days to about 56 days. Piglets should be weaned at age 28-35 days.

### 313 Itau Pig Starter

This product can be used from 50 days of age after the creep stage. Piglets can utilize this product up to approximately 80 days of age whereafter Itau Pig Grower should be used.

### 314 Itau Pig Grower

Piglets can be placed on Itau Pig Grower from 70 days of age. Pigs are very often slaughtered from this phase. The product can be used up to 120 days.

### 315 Itau Pig Finisher

If the producer produces baconers, this product is supplied from 100 days to slaughter.

## BREEDING PIGS

### Sows and Boars

Ensuring that piglets achieve optimal health and peak condition, and to ensure that the sow's reproductive capacity is reached, is directly linked to the sow's condition and nutrition during pregnancy and lactation. Itau's technological approach exploits the sow's ability to achieve production targets.

Itau seeks to increase litter size, optimize litter weight and weaning weight as well as to minimize mortalities. The body condition of the sow at weaning is an important benchmark against which is formulated to achieve quick reconception and ensure the maximum amount farrowing cycles per year.

### 316 Itau Dry Sow (Sow and Boar)

- Reach production goals in a simple way
- Ensure optimal development of the foetuses
- Stimulating ovulation
- Achieve desired condition score in the different reproduction stadia
- Specific intakes reduce the risk of embryo deaths

### Use as follows:

#### Sow

- Wean to service: 3.5kg-4.5kg per sow per day
- First three weeks of pregnancy: 2-2.2kg per sow per day
- Thereafter until three weeks before farrowing: 2-3kg per sow per day
- Thereafter until 5 days before farrowing: Increase Itau Dry Sow by 0.5-1.0kg per sow per day.
- From 5 days before farrowing, follow Itau Pig Lactating Sow's feeding recommendation.

#### Boar

- Two weeks before mating - Supply Itau Dry Sow at 2.2-2.8kg per young boar per day and 1.8-2.2kg per mature boar per day.
- As boars get more active during the mating season, feed supply may be increased a little.
- After the mating season, boars should eat 1.8kg per boar per day

### 317 Itau Pig Lactating sow

- Specially selected fats and oils to achieve the required energy density in the diet
- Increase in litter weight
- Better uniformity of the litter
- Better weaning percentages
- Better immunity in piglets
- Improved milk production and more fat in the milk
- More efficient use of energy in building body reserves and to use in the production of milk

### Feeding recommendation:

- Provide the product from 5 days before farrowing at 2.5kg per sow per day
- On the day of farrowing, supply only 1kg per sow
- For the following two days after farrowing, supply 2.5kg per sow per day and increase feed supply by 1kg per sow per day.
- From 5 days after farrowing to weaning, supply Itau Pig Lactating Sow according to the sow's requirements (ad lib).
- Day of weaning: No feed, only water according to sow needs.

%	Protein (min)	Lysine (min)	Methionine (min)	Moisture (max)	Fat (min)	Fibre (max)	Ca (max)	P (min)
312 Itau Pig Creep	19	1.2	0.35	12	2.5	4	0.8-1.0	0.65
313 Itau Pig Starter	18	1.1	0.4	12	2.5	5	0.75-1.0	0.6
314 Itau Pig Grower	15	0.85	0.3	12	2.5	8	0.6-1	0.6
315 Itau Pig Finisher	14	0.7	0.3	12	2.5	8	0.6-1	0.45
316 Itau Pig Dry Sow	12	0.5	0.3	12	2.5	8.5	0.75-1.2	0.6
317 Itau Pig Lactating Sow	15	0.75	0.3	12	2.5	8	0.6-1.2	0.6

### Replacement sows

After weaning, follow the Growing Pigs Feed recommendation up to 100kg (24 weeks). After that go onto 316 Itau Dry sow mash and service on approximately 135kg (30 weeks).
